DETAILED ACTION

Allowable Subject Matter

Claims 1, 6, 8-12, 17-18, 20-23, 27, 30, 32, and 34 are allowed.

Masao represents the closest prior art to the applicant's invention. The reference properly teaches an insulating film-forming apparatus comprising a process tower having plural process units stacked vertically. Although the process tower includes temperature control and heating units, neither is isolated to the passage of air therethrough; thus, the disclosure of Masao cannot anticipate the claimed feature of temperature control and heating units which are "isolated and sealed from the passage of air therethrough." Further, as the intended purpose of Masao's apparatus is to provide clean air inside each process unit [0024], the skilled artisan would not be motivated to seal the process units.

Secondly, Masao discloses a fan disposed at the top of the process units which blows air downward to an exhaust unit formed at the base of the tower. In contrast, the applicant's independent claims recite a blowing mechanism situated below each of the heating, temperature control, and coating units which blows air upwards through the coating unit and around the casings of the heating and temperature control units in that order before exhausting at a site above the heating unit. To achieve this configuration, the position of Masao's fan and exhaust units would have to be inverted and at least the coating and heating units would require significant revision to accommodate this reversal of flow. Accordingly, it is the examiner's position that one of ordinary skill would not be motivated to reconstitute the apparatus of Masao such that air is blown upwards through the coating unit to an exhaust unit stationed above the heating unit.

For these reasons, the prior art neither anticipates nor renders obvious claims 1 and 32.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The examiner has submitted a *Notice of References Cited* clarifying the publication dates of the previously cited references of JP 2002-064044 and JP 04-217353. The machine translation of the former and the translated abstract of the latter have already been disclosed during prosecution.
